

# NILAY KAPALEY

Java Full Stack Developer | Java 17 | Spring Boot | Microservices | Angular | REST APIs

Pune, India | +91 8720814612 | nilay.kapaley@gmail.com | linkedin.com/in/nilaykapaley

---

## PROFESSIONAL SUMMARY

Software Engineer with 5+ years of experience designing, developing, and supporting enterprise Java applications using Java 8/17, Spring Boot, Spring MVC, Hibernate, SQL Server, and Angular. Skilled in building scalable backend services and RESTful APIs following object-oriented programming, layered architecture, SOLID principles, and enterprise design patterns. Strong hands-on background in microservices architecture, including Spring Cloud, API Gateway, Eureka Server, Config Server, RabbitMQ, Kafka, and the Saga pattern for distributed transactions, developed through self-driven projects. Experienced with SQL query optimization, JUnit, Spring Security (JWT), OAuth2, OIDC, Docker, Kubernetes, SonarQube, Git, Maven, and Agile/Scrum delivery. Proficient in using AI-assisted development tools such as GitHub Copilot to accelerate code generation, refactoring, debugging, test generation, and documentation — improving delivery speed and code quality across the development lifecycle.

---

## CORE COMPETENCIES

- **Languages & Core Java:** Java 8, Java 17, Object-Oriented Programming, Collections, Multithreading, Concurrency, Streams, Lambda Expressions, Functional Interfaces, Generics, Exception Handling, Data Structures & Algorithms
- **Backend & Microservices:** Spring Boot, Spring MVC, Spring Data JPA, Hibernate, Spring Cloud, API Gateway, Eureka Server, Config Server, RabbitMQ, Kafka, Saga Pattern, RESTful APIs, Microservices Architecture
- **Frontend:** Angular, RxJS, Reactive Forms, Routing, TypeScript, JavaScript (ES6+), HTML5, CSS3, Bootstrap
- **Database:** Microsoft SQL Server, SQL, Stored Procedures, Query Optimization, Database & Schema Design, Transactions, Indexing
- **Security:** Spring Security (JWT), OAuth2, OIDC, Secure REST API Development
- **Cloud, DevOps & Architecture:** Docker, Kubernetes, AWS Fundamentals, Software Architecture & System Design, Design Patterns, Legacy Code Modernization
- **Quality, Testing & Tools:** JUnit 5, Mockito, SonarQube, Code Reviews, Static Code Analysis, Root Cause Analysis, Git, GitHub, Maven, Postman, Swagger, Jira, ServiceNow
- **AI-Assisted Development:** GitHub Copilot for code generation, refactoring, debugging, test generation, and documentation

---

## PROFESSIONAL EXPERIENCE

### System Engineer — Tata Consultancy Services

*Apr 2023 – Present*

- Designed, developed, and maintained enterprise-grade backend and full-stack applications using Java 17, Spring Boot, Hibernate, Angular, and SQL Server, supporting engineering and manufacturing workflows for enterprise clients.
- Built and delivered scalable RESTful APIs using Spring Boot and layered architecture, enabling seamless communication between Angular front-end and backend systems.
- Owned end-to-end delivery of business-critical modules — Scope Changes, Audit Trail, Resource Planning, SSOW, Business Plan Approvers Configuration, Engineering Deliverables, and PM Update — from requirements through deployment.
- Applied SOLID principles and enterprise design patterns to build reusable, maintainable software components, improving long-term system architecture and reducing technical debt.
- Optimized SQL Server queries, joins, and stored procedures, and tuned backend business logic to improve application performance and reduce response times.
- Resolved transaction management, data consistency, and concurrency issues using Spring Transaction Management and Hibernate best practices.
- Performed unit testing, debugging, code reviews, and static code analysis with JUnit and SonarQube to maintain high software quality and reliability standards.

- Collaborated within cross-functional Agile Scrum teams using Jira and Git across the full software development lifecycle, working closely with product owners to define requirements and identify risks.
- Used GitHub Copilot to accelerate code generation, refactoring, debugging, and documentation, improving development velocity and consistency.
- Investigated production issues through root cause analysis and delivered permanent fixes, improving application stability and operational reliability.

#### **Project Engineer — Wipro**

*Dec 2020 – Apr 2023*

- Developed and enhanced enterprise Java applications using Core Java, Spring Boot, Hibernate, REST APIs, and SQL, implementing new features and change requests based on functional requirements.
- Designed and modified RESTful web services using JSON for backend system integration.
- Wrote and optimized SQL queries and performed database analysis to support application enhancements and issue resolution.
- Performed unit testing, debugging, defect fixing, and code reviews to ensure consistent software quality.
- Investigated production issues through root cause analysis and implemented long-term, sustainable solutions.
- Supported application deployments and production validation as part of ownership over operational tasks.
- Worked within Agile Scrum teams using Jira, Git, and ServiceNow, following SDLC best practices.

#### **SELF-DRIVEN PROJECTS**

---

**Enterprise E-Commerce Microservices** — Java 17, Spring Boot, Spring Cloud, Hibernate, SQL Server, RabbitMQ, Docker, Spring Security (JWT), REST APIs

- Designed and built a microservices-based e-commerce platform with Product, Order, Inventory, Cart, Payment, and Shipping services following REST architecture.
- Implemented API Gateway, Eureka Server, and Config Server for service discovery and centralized configuration management.
- Used RabbitMQ for asynchronous inter-service communication and implemented the Saga pattern for distributed transaction management.
- Secured REST APIs with Spring Security and JWT authentication, and containerized all services using Docker.

#### **CERTIFICATIONS**

---

- Master Microservices with Spring Boot, Spring Cloud, Docker & Kubernetes
- Spring Framework Master Class
- Master Hibernate & JPA with Spring Boot

#### **EDUCATION**

---

**Bachelor of Engineering in Computer Science**

Truba Institute of Engineering & IT, Bhopal | 2016 – 2020
