SUMMARY

Java Developer with 5.9 years of experience designing, developing, enhancing, and supporting enterprise applications using Java 8/17, Spring Boot, Spring MVC, Spring Data JPA, Hibernate, REST APIs, SQL Server, and Angular. Experienced in developing scalable backend services using layered architecture, object-oriented programming, SOLID principles, and design patterns. Strong understanding of Core Java, Collections, Multithreading, Java 8 Streams, Exception Handling, Transaction Management, API development, database optimization, and production troubleshooting. Hands-on experience with JUnit, Mockito, Spring Security, JWT, Git, Maven, SonarQube, and Agile development. Familiar with Microservices, Spring Cloud, Kafka/RabbitMQ, Docker, and AWS through self-driven projects.

TECHNICAL SKILLS

- **Programming Languages:** Java 17, Java 8, SQL, JavaScript (ES6+), TypeScript
- **Core Java :** OOP, Collections Framework, Multithreading, Concurrency, Exception Handling, Streams, Lambda Expressions, Functional Interfaces, Generics, Comparable, Comparator, Optional, Data Structures, Algorithms, File Handling, ExecutorService, CompletableFuture
- **Backend Technologies:** Spring Boot, Spring MVC, Spring Data JPA, Hibernate, REST APIs, RESTful Web Services, Maven, Spring Validation, Global Exception Handling, Transaction Management, DTOs, Pagination
- **Microservices:** Microservices Architecture, Spring Cloud, API Gateway, Eureka, Config Server, Kafka, RabbitMQ, Saga Pattern, Circuit Breaker, Retry, Timeout, Resilience Patterns
- **Database:** Microsoft SQL Server, Oracle, SQL, Stored Procedures, Query Optimization, Database Design, Indexing, Transactions
- **Security:** Spring Security, JWT, OAuth2, OIDC, Authentication, Authorization, Secure REST API Development
- **Testing & Code Quality:** JUnit 5, Mockito, Unit Testing, Integration Testing, SonarQube, Static Code Analysis, Code Reviews
- **Frontend:** Angular, RxJS, Reactive Forms, Routing, HTML5, CSS3, Bootstrap, REST API Integration
- **Cloud & DevOps:** AWS, Docker, Kubernetes, CI/CD, Git, GitHub
- **AI-Assisted Development:** GitHub Copilot, AI-assisted Code Generation, Code Refactoring, Debugging, Test Generation, Documentation
- **Tools:** Postman, Swagger/OpenAPI, IntelliJ IDEA, Eclipse, VS Code, ServiceNow, JIRA, Chrome Developer Tools.

PROFESSIONAL EXPERIENCE

Tata Consultancy Services (System Engineer)

(April 2023 - Current)

- Designed, developed, enhanced, and maintained enterprise Java applications using **Java 17, Spring Boot, Hibernate, Angular, and SQL Server** supporting engineering and manufacturing workflows.
- Developed and maintained **RESTful APIs using Spring Boot**, implementing business logic, request validation, exception handling, transaction management, and integration between frontend and backend systems.
- Implemented business-critical modules including **Scope Changes, Audit Trail, Resource Planning, SSOW, Business Plan Approvers Configuration and Engineering Deliverables**.
- Applied **OOP, SOLID principles, design patterns, and layered architecture** to develop maintainable, reusable, and scalable application components.
- Optimized **SQL Server queries, joins, stored procedures, and backend business logic** to improve application performance and reduce unnecessary database operations.
- Resolved **transaction management, data consistency, concurrency, and performance issues** using Spring transaction management and Hibernate best practices.
- Developed reusable business services using **Java Collections, Stream API, Lambda Expressions, Functional Interfaces, and Generics**.
- Developed **Angular components, services, routing modules, and reactive forms** integrated with Spring Boot REST APIs.
- Implemented unit testing and performed debugging, code reviews, and static code analysis using **JUnit and SonarQube** to improve code quality.
- Investigated and resolved **production issues through root-cause analysis**, analyzing application behavior, database queries, and logs to deliver permanent fixes and improve application stability.
- Collaborated with cross-functional **Agile/Scrum teams** using Git and JIRA throughout the software development lifecycle.

Wipro (Project Engineer)

(Dec 2020 - Apr 2023)

- Developed and enhanced enterprise Java applications using **Core Java, Spring Boot, Hibernate, REST APIs, and SQL**.
- Implemented new business features, change requests, and application enhancements based on functional requirements.
- Designed and modified **RESTful web services using JSON** for backend integration.
- Wrote **SQL queries** and performed database analysis to support application enhancements and issue resolution.
- Performed **unit testing, debugging, defect fixing, and code reviews** to ensure software quality.
- Investigated production issues through **root cause analysis** and implemented long-term solutions.
- Supported **application deployments and production validation activities**.
- Worked in Agile Scrum teams using **Jira, Git, and ServiceNow** following SDLC best practices.

EDUCATION

Bachelor of Engineering in Computer Science

(2016 - 2020)

Truba Institute of Engineering & IT, Bhopal

SELF - DRIVEN PROJECTS

Enterprise E-Commerce Microservices

Technologies - Java 17, Spring Boot, Spring Cloud, REST APIs, SQL Server, RabbitMQ, Docker, Spring Security (JWT)

- Designed and developed a **microservices-based E-Commerce application** using Spring Boot and Spring Cloud.
- Developed **Product, Order, Inventory, Cart, Payment, and Shipping services** following REST-based service architecture.
- Implemented **API Gateway, Eureka Server, and Config Server** for request routing, service discovery, and centralized configuration.
- Implemented **RabbitMQ/Kafka-based asynchronous communication** between microservices.
- Implemented the **Saga Pattern** for managing distributed transactions across services.
- Secured REST APIs using **Spring Security and JWT authentication**.
- Containerized microservices using **Docker** for consistent application deployment.
- Implemented resilience mechanisms such as **timeout, retry, and circuit breaker**.

CERTIFICATIONS

- Master Microservices with Spring Boot, Spring Cloud, Docker & Kubernetes
- Spring Framework Master Class
- Master Hibernate & JPA with Spring Boot
